

## FOIL ART

- Aluminium foil
- Cardboard
- String
- Scissors
- Glue
- Permanent markers

### Aluminium Foil Art

1. Cut out a piece of aluminium foil that's slightly bigger than your cardboard.
2. Draw a simple design or a picture on the cardboard. Cover the outline of the design/picture with glue and string, and set it aside to dry for a few minutes.
3. Cover the dull side of the aluminium foil with glue and wrap the foil around the cardboard, securing the edges of the foil to the back of the cardboard with glue or sticky tape.
4. Rub your fingers gently over the foil on the front of the cardboard to help the string design/picture show through.
5. Colour in your design/picture with permanent markers (avoid going over the string), and allow to dry.
