

PINWHEELS

Easy Pinwheel Pattern

- Scissors
- Fasteners (pin)
- Coloured paper / white paper cardboard
- Drinking straws
- Pencils, stamps, stickers etc.

1. Trim the piece of paper or card until it is a square, with sides equal to the width of the page.
2. Colour one side and then the other – decorate any way you like.
3. Fold the square in half diagonally, each way, so that you have two diagonal folds which cross in the centre of the page.
4. Cut along the folds, but stop at least 3cm from the centre, as shown by the dotted lines in the diagram. The page should now look like 4 triangles joined at the centre.
5. Take one corner of each triangle and fold it over until the point is on the centre of the square. Each corner should overlap the one underneath slightly.
6. Now prick the pin through all four points and through the centre of the page and stick it into the blunt end of a straw.
7. Wave it in the air or blow on it, to get the sails to rotate. Loosen the pin slightly if necessary to allow the sails to turn more freely.
